

# In-house development and collaboration in InPreD-Norge

3rd Annual workshop on  
bioinformatics and variant  
interpretation in InPreD

[https://inpred.github.io/25-06\\_bioinfo\\_ws/develop\\_and\\_collab](https://inpred.github.io/25-06_bioinfo_ws/develop_and_collab)

# Overview

1. Project planning
2. Development
3. Issue and bug handling
4. New features

# collaboration\_docs 👤💬

how to develop tools and services in collaboration with other inpred nodes

## Communication channel 📌

Our current channel of communication is the email list. We should try to set up a more direct channel of communication such as slack, gather, mattermost or teams. By means of the communication channel, we should share biweekly updates on projects regarding all nodes; preferably, a list with ongoing projects and a short comment or just "none" if nothing has happened. This will ensure that everyone is up to date and knows what is going on - anything that is handled through PRs can be omitted as people get notified anyways.

## Project planning 📅

Prior to starting a new project, a short meeting with at least one representative of each node (option to opt out) to discuss and plan the new tool or service should be held. This meeting can be referred to as the scoping meeting
